

Safe Ingredients for a Safe Temporary Stain

I use natural and sustainable farming practices to grow many of the ingredients for paints and stains that make a Mehandi or Harquus. I'm a proponent of wholistic Ayurveda, healthy life, nutritious food, honesty, and balance of all matters.

Stains usually include citrus & berry juices & oils, plant, tree & shrub: barks, roots, oils, resins, pigments, sugar. And may contain small amounts of: honey, herbs, wheat flour, rice starch, isopropyl alcohol, ammonia, salt.

If you have sensitivity to any of the above ingredients or are experiencing compromised health issues or allergies or are pregnant or nursing you may need to avoid staining.

Remember to recycle:

Give this to a friend & visit www.jilljj.com for real referral recycle rebates that rock, and fine art galleries upon galleries of eye sweets, essential oils, heirlooms, preserves & seeds, and ideas for a better world.
